REPORT NO.

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE
OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT 50
U.S.C. 31 AND 32, AS AMENDED. ITS TRANSMISSION OR THE REVELATION
OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PRO-
HIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

1945 - 1946

1. An airfield with a spur track was located on the northern out-
skirts of BREST (23°42'E/52°05'N), White Russian SSR, not far
from the railroad transloading station. A hangar and nume-
rous earth bunkers serving as quarters were located on the
edge of the field. A 66 x 660-foot concrete landing strip
was near the hangar.
2. The airfield was occupied by 60 to 70 single-engine and twin-
engine aircraft of various types, including planes of German
origin. There was flying only with biplanes of Soviet make.

25X1

June 1946 - May 1947

3. The airfield, located northwest of the BREST railroad trans-
loading station, just east of a double-tracked railroad line,
had a small hangar and a solid building. There was only day
flying with eight to ten biplanes. One twin-engine Douglas
daily landed at the field.

25X1

1946 - May 1948

4. The field was located west of the transloading station, east
of the double-tracked standard-gauge railroad. Ten
biplanes were observed.

- 2 -

25X1

1946 - June 1948

5. The BREST airfield was not far from the transloading station. No hangars were observed. There were four underground fuel containers of a capacity of 8 to 10 cubic meters each. The field was occupied by about 10 biplanes. Twin-engine transport aircraft occasionally landed at the field.

25X1

February 1949

6. A 2,000 x 5,000-foot airfield was located east of the BREST-North railroad station. There was no hangar or runway. The field was occupied by eight biplanes in mid-February 1949.

25X1

Comment:

The BREST-North airfield is a former commercial airfield. According to available information, it seems to be of no military importance. The observed flight training with some biplanes was possibly conducted by the local MVD unit or by ROSAV.
